Does the repair process disable viruses?

Restoro deactivates viruses and makes sure they will not be executed again after reboot. Restoro also repairs the damage they may cause. However, viruses may remain in non-system areas on the PC, so it is highly recommended to run good antivirus application after the repair in order to clean the hard disk.

However, as one of our valued customers, we would like to extend our service and provide you a quick resolution, please contact our Support team now, and they'll be more than happy to help you.
