

How can I fix Runtime error 52: Bad filename or number?

- Uninstalling apps clashing in the background might prove effective in handling this error. Also, a program called Worldox found in Excel, locate and delete it, then restart your program.

1. Reinstall runtime libraries

1. Click on the `Windows` icon and open **Settings**.
2. Now click on **Apps**, next on *Apps & Features*.
3. Find and highlight the **Microsoft Visual C++ Redistributable Package**, now click *Uninstall* at the top of the list.
4. The moment you are done, **restart** your computer.
5. Lastly, [download the latest redistributable package from Microsoft](#), then install it.

2. Perform in-place upgrade

1. On your favorite browser, go to the [Windows 11 Download page](#).
2. Click on **Select Download** under *Download Windows 11 Disk Image (ISO)*, then choose **Windows 11**.
3. Next, click the **Download** button.
4. Choose the product language you want, then click the **Confirm** button.
5. Now you will receive a download link, and you will be able to click on the **64-bit Download** button to get the Windows 11 ISO.
6. Right-click the ISO file you downloaded and select the **Mount** option. Another option for this is to create a bootable USB or DVD.
7. A new virtual drive will pop up in your **File Manager** window. Click on it and double-click the setup file to begin the installation process.

However considering you have already purchased Restoro and would like us to assist you in doing that utilizing a remote session, please contact our support and they will be happy to help you.
