

How to change the language in Windows 10

The Microsoft Windows operating system allows users to change the display language from one language to another. Some restrictions may apply, depending on the version of Windows.

Windows 10

1. Press the [Windows key](#), type **Regional & language settings**, and then **press Enter**.
2. In the window that appears, click the  icon.
3. You may type in a language to add or select from the list.
4. After you select a language, you'll be asked to **pick a region**.
5. You should now see the new language under the *Languages* section.
6. Click the new language again and select the  button.
7. In the screen that appears, under *Language options*, click the  button.
8. Once the new language is downloaded, return to the previous screen.
9. Click the new language again and then the **Set as default** button.
10. **Restart your computer** to display the new language.

However considering you have already purchased Restoro and would like us to assist you in doing that utilizing a remote session, please contact our support and we are happy to help you.
