

# How to clear the cache in Microsoft Edge

When Websites are not loaded with the latest data, it could be because you have to delete cached files, in order to let the browser download new data. To empty the cache you can follow one of the instructions below:

To delete the browser cache in Microsoft Edge through the menu, follow these steps:

1. Click on the "**Hub**" symbol in the main menu.
2. Then browse to the "**History**".
3. Now you can click on "**Delete the whole History**".
4. Check the option "**temporary services and files**" and confirm the selection with a click on the "**Delete**" Button.

However considering you have already purchased Restoro and would like us to assist you in doing that utilizing a remote session, please contact our support and we are happy to help you.
