How to enable Dark Mode in Windows 10?

You can dim the lights in Windows 10 as well, if you want to conserve a bit of battery life or lessen the strain on your eyes, or if you just like how a darker color palette looks on Microsoft's OS.

1. From the Start menu, open Settings.
2. Tap Personalization, and then over in the left navigation pane, tap Colors.
3. Under the label Choose your default Windows mode, turn on the Dark button.

You may need to choose Custom from the Choose your color menu to see the dark mode choice.

If you encounter some difficulties following the steps above, considering you have already purchased Restoro or you are someone who is in need of assistance on your computer, please contact our support and they will be more than happy to assist you.
