How to fix Bluetooth that is not working?

Bluetooth is a wireless technology standard for exchanging data between fixed and mobile devices over short distances using short-wavelength UHF radio waves in the industrial, scientific and medical radio bands, from 2.400 to 2.485 GHz, and building personal area networks.

1. on **"*Start*"** and search for Change Bluetooth.
2. From the Options tab, select **"*Allow Bluetooth device to find this computer*"**, and make sure Allow Bluetooth devices to connect to this computer is selected.
3. Click **"*OK*"** and try to connect to your device.
4. If still not working update your Bluetooth driver.

If you encounter some difficulties along the way, considering you have already purchased Restoro or you are someone who is in need of assistance on your computer, please contact our support and they will be happy to help you.
