

# How to make the Windows 10 Start Menu smaller or bigger?

PCs come in all shapes and sizes which means that the Start menu, which takes up roughly the same amount of screen real-estate regardless of size, can definitely come in handy.

On a smaller display, however – such as that of a compact tablet – this can get annoying. Luckily, resizing the menu is simple:

1. Move the mouse to any corner and drag it whichever way you want.
2. Once it's the right size for your screen, let go of the corner and it'll stay that big.
3. If you want to adjust it further or move it back, just repeat the process until you're happy.

However considering you have already purchased Restoro and would like us to assist you in doing that utilizing a remote session, please contact our support and they will be happy to help you.
