

# How to resolve WiFi that is constantly dropping?

Unchecking the option to allow your computer to turn off to save power from power management can fix the problem with internet connection dropping. Please do the following:

1. Press Windows + R
2. Type devmgmt.msc
3. On the device manager right click on the network adapter and choose properties
4. Go to Power Management tab
5. Uncheck Allow computer to turn off this device to save power and click OK

However considering you have already purchased Restoro and would like us to assist you in doing that utilizing a remote session, please contact our support and they will be happy to help you.
