# How to turn Google Chrome's Memory Saver on or off

To save your computer's memory and help active tabs run smoothly, Chrome deactivates tabs that you aren't currently using. When you access an inactive tab, it automatically reloads.

1. On your computer, open Chrome.
2. At the top right, click More ⋮ 〉 **Settings**.
3. On the left, click **Performance**.
4. Turn **Memory Saver** on or off.
