

# Installing Device Drivers

Commonly known as driver, it's a group of files that enable one or more hardware devices to communicate with the computer's operating system. Without, such hardware devices won't function or work properly.

Drivers can be obtained, installed or updated through the following means:

- CD or DVD driver installer
- Driver update from USB drive
- Driver update via online download

Would like to know what kind of driver you need for your computer devices? Feel free to contact our support team and we will do our best to help you out.
