

Keep getting Memory Management and Critical Process Crash Results for Restoro

We suggest running a Memory Diagnostic Test on your computer by doing the following:

1. Press Windows + R
2. Type mdsched and click OK
3. On the Windows Memory Diagnostic dialogue box click "Restart now and check for problems (recommended)"
4. The PC will automatically restart

However considering you have already purchased Restoro and would like us to assist you in doing that utilizing a remote session, please contact our support and they will be happy to help you.
