

What to do with Internet Explorer flashing and then automatically closes?

Note: *There is a possibility that a Malware Browser Helper Object causes the issue.*

1. Click "**Start**", point to **Settings** and then click "**Control Panel**".
2. Double-click "**Internet Options**".
3. Click the "**Advanced tab**".
4. Under **Browsing**, clear the Enable third-party browser extensions (requires a restart) checkBox.
5. Restart Internet Explorer.

However considering you have already purchased Restoro and would like us to assist you in doing that utilizing a remote session, please contact our support and they will be happy to help you.
