

Windows Troubleshooter is not working

Windows Troubleshooter will not run if the "Cryptographic Services" stopped.

To fix this, please do the following:

1. Press Win+R to open Run. Type services.msc press OK.
2. On the Service Manager. Scroll down to "Cryptographic Services" on the list. It will be set to Manual.
3. Double-click and change its Startup type to Automatic. Also, click on the "Start" button to immediately start the service. Click Apply.
4. Run the Windows Troubleshooter again

However considering you have already purchased Restoro and would like us to assist you in doing that utilizing a remote session, please contact our support and they will be happy to help you.
